# Overview

## How the Bridgestone Tyre Damage Guarantee works

The Bridgestone free Tyre Damage Guarantee covers:

- ✓ Passenger
- ✓ 4x4
- ✓ SUV

Tyres from 17 inch and above, excluding runflat tyres, purchased within the boundaries of South Africa.

The guarantee is valid for a year from the date of purchase in the event of road hazard damage.

"Road hazards" are cuts, bruises, impact or irreparable punctures and tyre damage caused by rocks, broken glass, potholes or curbs.

### Working out the remaining tread

The tyre's remaining tread life (usable tread) is established using a tread depth gauge. The average remaining depth of the tread is then divided into the tyre's tread depth when new.

The result of this calculation gives us a ratio and the ratio is used to determine the credit amount.

## SOME THINGS CAN'T BE PLANNED FOR.

## Calculation example for credit amount:

A 17 inch passenger tyre costs R1000 and has an original tread depth of 8mm. When the tyre is brought to **Tiger Wheel & Tyre** there is 6mm tread remaining.

= Remaining tread depth / original tread depth = usable tread %  
= Usable tread % x tyre purchase price  
= Credit amount

= 6mm/8mm=75%  
= 75% \* R1000

= R750 = Credit towards purchase of new tyre

You only pay R250 towards a new tyre.

## 3 easy steps to claim

1 Return the damaged tyre to the store where you purchased your tyre / visit your nearest **Tiger Wheel & Tyre** store.

2 \*The store will establish the average remaining tread depth measuring from the lowest point. Once this is established, the store will inform the amount payable by you based on the remaining tread calculation.

3 The new tyre will be automatically registered for the Tyre Damage Guarantee if purchased from **Tiger Wheel & Tyre**.

### User obligation

The guarantee is void if the tyres have not been properly maintained. making it a habit to get your tyres checked could save you money and even your life.

## Quick Tips

Check your tyre:

- For wear and tear like cracks and bubbles
- For uneven wear that results from incorrect alignment
- Pressure to ensure that your tyres are inflated to the correct pressure.

Take your vehicle in for wheel balancing & alignment every 10 000km or once a year, whichever comes first.

\*tyres with a tread depth of 1mm or less are not eligible for a claim.
